■ WAX AND SEALER

Wax and sealer are applied to the hemmed portions of the hood, door panels and back door to improve rust-resistant performance.

■ UNDER COAT

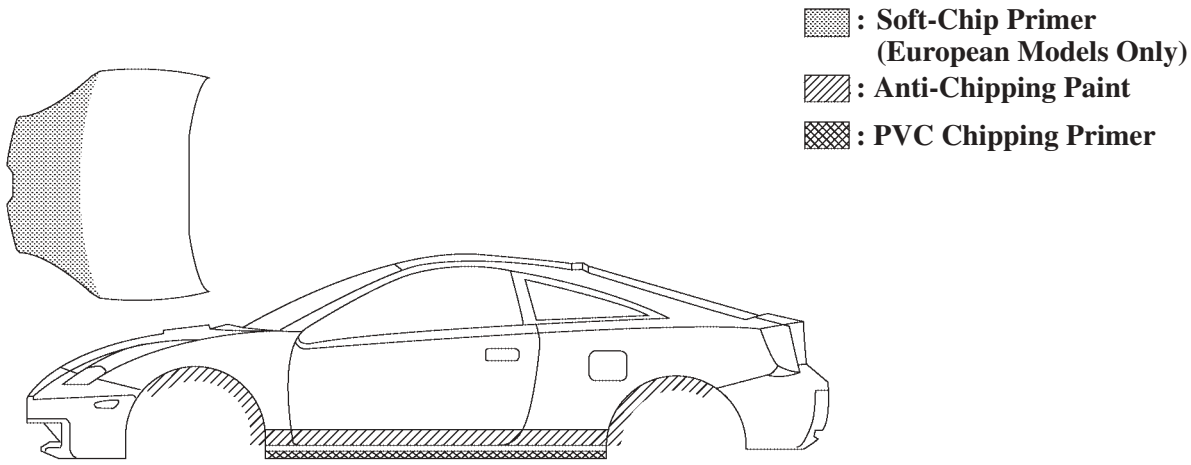

PVC (Polyvinyl Chloride) coating is applied to the under side of the body.
The bottom side of the cowl panel, the fender apron and other parts which are subject to damage by stone chipping.

■ ANTI–CHIPPING APPLICATION

Anti-chipping paint and PVC chipping primer are applied to the lower door panel area, front and rear wheel arches and the rocker panel area to protect them from stone chipping. In addition, soft-chip primer is applied to the front hood area for European models only.
