DEVELOPMENT OBJECTIVES

The new Celica has been developed with the style and performance through which younger users can recognize the vehicle's sports speciality concept.

MAIN CHARACTERISTICS

- **Designed with a new taste that gives a firm impression of the four wheels gripping the road, revealing the vehicle's high level of driving performance.**
- **Both the high levels of "stability and critical performance" of a grand touring car and the "lightness and nimbleness" that can be enjoyed under normal use conditions have been achieved.**
- **New mechanisms have been incorporated to ensure an enjoyable driving experience.**
