SRS AIRBAGS

SRS airbags are provided for the driver and front passenger as standard equipment on all models, and SRS side airbags are provided as standard equipment on RHD models for Europe, and available as optional equipment on LHD models for Europe and all models for Australia.

- **An SRS airbag, which supplements the occupant restraining function of the seat belt, provides a function to help reduce the risk of injury to the occupant's head or chest portion during a front collision.**
- **If a strong impact is received from the side, an SRS side airbag helps reduce the risk of injury to the occupant's chest area.**

SEAT BELTS

- **A 3-point ELR seat belt with an electrical pretensioner and force limiter for the driver and front passenger seats as standard equipment on all models.**
- **A 3-point ALR-ELR seat belt is provided for the rear seats as standard equipment.**

ABS (Antilock Brake System) WITH EBD (Electronic Brake foece Distribution)

- **ABS with EBD is standard equipment on all models for Europe and optional on all models for Australia. This system helps prevent the wheels from locking during sudden braking or braking slippery road, thus assisting the vehicle stability and steering performance. The EBD control realizes the proper brake force distribution in accordance with the driving conditions.**
